

# NICOLAS LEFELD

Backend Developer specialized in Node.js and Go | AWS | TypeScript

+5492613159290   lefeldnicolas@gmail.com   linkedin.com/in/nicolas-lefeld/   Argentina

## SUMMARY

Backend developer with 6+ years of experience working on scalable systems using Go and Node.js. Skilled in AWS, microservices, and clean architecture. Recently expanded into frontend development and team leadership roles while working on gaming and blockchain platforms. Strong focus on code quality, performance, and building robust backend platforms. Passionate about learning and solving real-world problems with elegant solutions.

## EXPERIENCE

- 07/2023 - Present

Golang + NodeJs + Blockchain dev.  
Trick Gaming Studios
  - Developed a multiplayer web platform using Golang, contributing to the architecture and implementation of core game logic and backend infrastructure. Also worked on blockchain features, integrating Web3 tools and smart contract interactions using Node.js. Took on occasional leadership responsibilities and contributed to frontend tasks to support full-platform delivery. Focused on delivering high-performance APIs and seamless gameplay experience across services.
- 02/2023 - 07/2023

Back End Developer  
Fanstastic
  - Led backend development for a decentralized content platform using AdonisJS and Web3Auth. Integrated Lens and Transak to enable identity and payments. Acted as Product Owner while handling backend tasks, until the project was paused for budget reasons.
- 04/2022 - 02/2023

Backend developer  
CeibusTech
  - Worked on the YopitPago digital wallet project, delivering the MVP and extending its core features. Built scalable backend services, integrated payment modules, and collaborated with cross-functional teams to enhance the product's stability and usability.
- 02/2021 - 04/2022

Backend Developer  
Cognizant Softvision
  - Developed internal project management tools for Duke Energy. Focused on creating maintainable and scalable services, improving system efficiency and collaborating with teams to design practical backend solutions.
- 08/2020 - 02/2021

Ssr Backend Developer  
Globant
  - Participated in the development of WOM's new self-care platform. Built and maintained backend services to improve user interaction and streamline workflows, collaborating closely with frontend and QA teams.
- 12/2019 - 08/2020

Backend Developer  
U7 devs
  - Backend developer for a startup project. Built a Node.js backend with Express, integrated Coinbase and Stripe for payments, and containerized the app with Docker to meet delivery deadlines. Focused on fast iteration and business-ready deployment.
- 08/2018 - 12/2019

Full stack developer  
Universidad Champagnat
  - Developed the eTramites student platform and supported various internal systems. Improved UX and backend workflows to optimize foundation processes and ensure smooth platform operation.
