WORK EXPERIENCE

Backend dev - NodeJS

FANSTASTIC   feb. 2023 - may. 2023

The project it's a decentralized content creator network based in Web3 and Blockchain. We use Web3Auth, Lens, Transak among others and I'm at the backend with AdonisJS with some PO responsibilities. At the end, the project ran out of budget so the development process stopped.

Lens · Transak · Amazon S3 · Adonis · PostgreSQL · Amazon Web Services (AWS) · Node.js · GitHub

Backend dev - NodeJS

CEIBUSTECH   apr. 2022 - feb. 2023

I started working at CeibusTech on the YopitPago wallet. The project is about a year and a half old but Yopit changed the development team to the CeibusTech team.

PostgreSQL · Amazon Web Services (AWS) · NestJS · TypeScript · Node.js · Docker

Backend dev - NodeJS

COGNIZANT SOFTVISION   feb. 2021 - apr. 2022

I was assigned at the Duke Energy firm, developing a management system for their internal projects.

AWS Lambda · Mongoose · Node.js · MongoDB · Docker · Microservices

Backend dev - NodeJS

GLOBANT   ago. 2020 - feb. 2021

The project was about developing the new self care platform for the customers of WOM.

Koa · Node.js · Microservices

Backend dev - NodeJS

U7 DEVS   dic. 2019 - ago. 2020

I had the task to develop all the backend by myself, implement all the technologies to get the MVP at time. We had some tools to monetize the app like coinbase, stripe, mercadopago, etc..

Express, Lambda, Stripe, Coinbase, Paypal, MercadoPago, MongoDB, AWS, REST, GitLab, S3, JWT, Heroku

Full Stack dev

FUNDACION SANTA MARIA   aug. 2018 - dic. 2019

I was particularly assigned to develop the student platform, in addition to that we provided support to the already existing internal platforms that were used to manage the foundation.

HTML5, PHP 7, MySQL, Jquery, Ajax, Bootstrap 4 CSS3, etc.
